

Stone Container - Reduction of H₂S, corrosion and related benefits

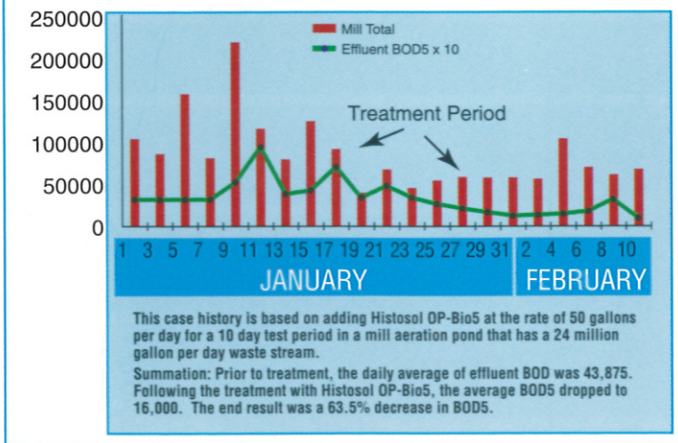

This graph depicts H₂S reduction with 80.6% reduction within the first 24 hours of treatment.

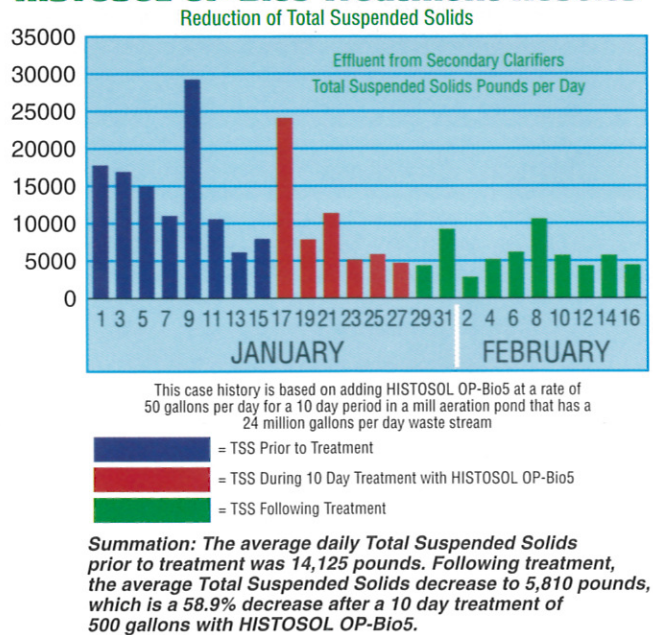

This graph depicts an 87.5% reduction in corrosion over a three-year period. Substantiated by copper corrosion coupon testing.

HISTOSOL OP-Bio5 TREATMENT RESULTS REDUCTION OF BOD

This graph depicts biological enhancement resulting in over-all reduction in final effluent BOD.

HISTOSOL OP-Bio5 Treatment Results

This graph depicts biological enhancement and improved polymer bio-production resulting in over-all reduction in effluent total suspended solids.
